The logo for VK Platinum is located on the left side of the page. It features a stylized sunburst or starburst pattern in gold and black, with the letters 'UM O<sup>2</sup>' in white on a black background. The logo is partially obscured by a large, curved, light blue shape that frames the top and right sides of the page.

## VK Platinum Mission

Platinum is a company that specializes in botanical nutrition from nature's natural, uncultivated wild plants as an essential source of food for humans. As a result of exhaustive research and application, the best option for optimal nutrition available in the natural world.

The premise of the nutritional model in human nutrition presented by V K Platinum is scientific and straightforward. The nature evolved human beings and all other life forms on the planet through plant life primarily. As a result, vast life forms developed from this environment from the basis of plant evolution as a portion of food for animal life forms, and it is from this premise through which we reconstruct these pre-Jurassic botanical plant kingdoms to form a powerful nutritional defense army which includes:

- Bryophyte's species and subspecies
- Pteridophytes species and subspecies
- Angiosperm species and subspecies
- Gymnosperm species and subspecies

Scientific data-based research has proven the importance of natural non-cultivated plants holds the key to greater nutrition density based upon the origin of the many species responsible for industrial, agricultural plant varieties, which through hybridization no longer contain the genetic integrity of its wild ancestors with all of their inherent qualities absent in the hybrid varieties available throughout the world

# VK PLATINUM

There are over thirty thousand edible plants on the planet, yet humans consume just a tiny fraction of these plant species, which grow naturally throughout the earth's ecosphere. Modern-day humans consume almost exclusively industrial crops, lacking many of the critical nutrients that humans need for an overall healthy existence. The platinum mission is to formulate and distribute the vast nutritional resources naturally available throughout the world's vast ecosystems into a powerhouse of nutritional products that will nourish and optimize the health of millions of people worldwide. All of whom will experience real nutrition unhindered by harmful agricultural practices that harm all life in all parts of the world by having the option for real nutrition supplied by nature's vast supply of superior botanical nutrition.

And to make this effort global, Platinum VK is introducing Platinum02 Crypto Token, which will enable end-users of the products to utilize the Platinum02 Token to increase the health and wealth of millions of people worldwide.

Our world is currently experiencing a global health crisis unparalleled in modern history. The optimal nutrition using nature's force builds upon the physical premise, which defines biological life impeded by artificial introductions; it can be neutralized through the judicious use of nature-culture verses agriculture.

We combine optimal health via superior botanical nutrition and marry it to cryptocurrency while rewarding high-performance go-getters to expand the network.

# VK PLATINUM

This creates the most powerful synergistic force in the world, which propagates six prime principles of personal power expressed through the following:

- Control your mind
- Control your time
- Control your money
- Control your health
- Control your growth
- Control your path

V K Platinum's innovative approach to optimum living begins with mind and body, the essential material for self-mastery. Through decades of research, application, and results, VK Platinum is now ready to share this prime awareness through superior nutrition at the cellular level supported by PLATINUM O2 crypto Token.

## DNA and Nutrition

On a linear scale, tracing back one's ethnicity through both one maternal and paternal lineages, we can now look at in detail nutrient deficiencies that negatively affected past generations. Through this data, it is now possible to correct persons' inherited deficiencies with superior nutrition obtained through nonagricultural botanicals harvested from nature's vast botanical bounty, most of which predate the Jurassic period when life on the earth received fourteen percent more oxygen.

Now, let us direct our attention to the category of plants known as Pteridophytes, which are plant species that do not produce seeds, nor do they flower. They produce spores; this classification of plants includes but is not limited to

- Ferns
- Mosses
- Algae
- Lichen's
- Seaweed
- Fungi/Mycelium

But what is most important about Pteridophytes is that early humans consumed large quantities of plants from this classification of plants, which may hold the key to functionally expandable DNA series activation in humans. Potentially opening up centers of the brain, bio rejuvenation cells, as well as enhanced physical capabilities. Through DNA complexes, science has repeatedly presented data that illustrates latent DNA sections of the brain and organs, which suggests that this consistent section of dormancy exposed to various elements may, in theory, activate the dormant DNA.

# VK PLATINUM

Furthermore, understanding humans' long existence on this planet and the survival rate under extremely adverse conditions helps us unravel specific environmental contributions to early humans' development, notwithstanding the botanical importance of human development.

## Why are Pteridophytes important?

One important factor that must be carefully understood is that early humans ate the foods close to the ground rather than up on trees, which required much more effort to obtain. This is where Pteridophytes focus on obtaining foods for both humans and animals.

Most Pteridophytes grow close to the ground. For humans and animals they serve as a convenient source of sustenance, but for further proof, let us examine the typography of plant species' geographic placements. The number one source of early food items was sea plants, which grew in abundance from the ocean and sea floors. Besides, algae and mosses, which grew in shallow waters and large rocks close to seashores. As we move further inland, we find gymnosperm plants such as coconut fruit. Also, ferns, mushrooms, and angiosperm plant species, including berries, fruit trees, succulents, and plant exudates from various trees such as sugars, saps, amber gums, and more as vital energy substances used by early humans.

These eating habits of selected plant species were, in fact, the primary sources of food for early humans, which sustained and evolved humans to this very day. What is more fascinating about this early period of human nutrition derived botanical findings were the following observations:

- Humans DNA series was higher than modern-day humans
- Humana DNA genome was more complex
- Human immune capacity was multiple times greater than modern humans
- Human bone density was greater than modern humans
- Huma muscle mass was greater than modern humans
- Human mental and intellectual capacities evolved rapidly
- Family and tribal organization evolved rapidly
- Humans' ability to live harmoniously within the environment also evolved rapidly.

Revisiting the efficacy of early human nutrition enables modern society to fully incorporate ancient nutritional practices of natural plant selection as a primary source of nutrition. To fulfill core nutrition deficiencies in humans that modern agriculture cannot supply in quantity or quality. This is where VK Platinum focuses its attention and initiatives, and that is to introduce an entirely new classification of superfoods containing super nutrient density which can only be found in nature's infinite intelligence expressed in botanicals.

## Magnesium Deficiency Epidemic

An alarming health crisis has emerged in magnesium deficiency in over ninety percent of the western population throughout the developed nations. The urgency of this crisis is particularly important considering that magnesium is responsible for over thirty essential body functions and metabolic processes, which are dependent upon magnesium availability in adequate proportions to regulate bodily functions, which include:

- Magnesium is responsible for the synthesis of glutathione which is essential in healthy skin tissue.
- Magnesium is responsible for over Six Hundred Biochemical Reactions
- Can decrease Perimenopause symptoms
- Can increase a woman's bone density after menopause
- Bioavailable magnesium can help reduce obesity
- Bioavailable magnesium can decrease memory loss
- Many illnesses can be attributed to magnesium deficiency
- Magnesium deficiency can lead to depression, ADHD, hormonal imbalance, PMS, Cardiac arrhythmia
- Magnesium deficiency can negatively affect brain function and heartbeat regularity
- Magnesium deficiency negatively affect bone and joints
- Magnesium deficiency can greatly increase cancer risks
- Magnesium deficiency can increase defects in DNA repair
- Magnesium deficiencies accelerate the aging process and disfunction of cellular function and repair

Magnesium bioavailability is also responsible for the production of ATP and the utilization of it Adenosine triphosphate (ATP), an energy-carrying molecule found in the cells of all living things. ATP captures chemical energy obtained from the breakdown of food molecules and releases it to fuel other cellular processes While adequate bioavailable magnesium from plant have between (200 to 300 mg) that are required for a healthy body daily.

When mineral deficiencies inhibit the human biochemical processes, this condition often begins with a key mineral such as magnesium, followed by potassium, calcium, iron, and zinc. The supply of bioactive magnesium from nature's original DNA botanicals unprocessed may hold the keys to correcting nutritional deficiencies worldwide.

# VK PLATINUM

## Bio Immune Genetic Nutrition

The physical premise of the VK Platinum nutritional foundation is based solely upon ancient nutrition, to which humanity originally evolved. The research completed regarding the nine DNA series of early humans in western, central, and southern Africa is perhaps the most compelling data available regarding the superior nutrition abundant in nonagricultural botanical species available throughout the African continent. Furthermore, the distinct four categories of plants that comprise the greatest nutrient density for human health are the following:

- Angiosperm African Species and Sub Species 24 % Usage (Plus other continents)
- Gymnosperm African Species and Sub Species 25 % Usage (Plus other continents)
- Pteridophyte African Species and Sub Species 34 % Usage (Plus other continents)
- Bryophytes African Species and Sub Species 22 % Usage (Plus other continents)

The four categorical classifications represent the primary botanical varieties of all plant life on the earth. They are not limited to the African continent: but a planetary approach to naturally growing plants in nature, emphasizing non-agriculture crops or breeds.

Bearing in mind that the African continent is where humans began compels us to research deeper into the Bio-chemical nature of the earliest plant varieties consumed by early humans. It evolved the nine DNA series prevalent in later humans, and why this botanical wealth must be reintroduced to humanity as a complementary nutritional powerhouse treatise for potential new super foods that could be cultivated rather than breeding unnatural varieties according to western market models.

The initiatives of VK Platinum involves a global view of health, and this includes DNA-specific nutrition and, more particularly, the nutritional needs of multi-cultural DNA nutritional needs of multi-lineage groups and individuals. Such an approach combines the multi-level academic body of professionals providing corroborating data which substantiates VK Platinum's contributions to global health.

# VK PLATINUM

## DNA Lineage Industries

In partnership with a university, Platinumvk has embarked upon an extensive project with the assistance of a link between heritage and DNA nutrition as a national project to trace lineages of people, races, ethnic groups. Also, the many migrations that have occurred over the last five hundred years to ascertain the important link of nutrition to each of these groups relate to inherent nutrient deficiencies that may have continued adverse conditions on current generations through traditional practices of nutrient intake.

Through deep nutrition, many if not all nutritional deficiencies can be addressed by using nature's vast botanical wealth in the form of pre-Jurassic botanicals containing nature's rich DNA nutritional signatures.

Modern science research into nonagricultural botanical species contains nutrients, minerals, amino acids, and other compounds that cannot be found in domesticated crops, which are superior in many ways to crops by comparative nutritional analysis.

Platinumvk initiatives in the re-discovery of natural botanical efficacy for modern nutrition emphasize correcting nutritional deficiencies. Human populations can greatly reduce a wide range of health challenges that lead to more severe health-related issues, which can be addressed by using nature's DNA botanicals.

This DNA lineage approach can help people identify previous deficiencies common within their lineages to include a corrective approach which can address deficiencies immediately by using distinct botanical compounds traditionally used to address identified deficiencies inherited genetically or dispositional.

## Global Health Crisis

2020 has presented to the world how a global pandemic can fundamentally alter the course of human history in all of its dimensions. The question now is how do we prepare for the next crisis?

VK Platinum is the only company that has taken a worldwide view of the nutrition spectrum with a planetary action plan, which combines pre-Jurassic botanical nutrition as a viable force of nature through which the original sustenance. This was afforded to early humans may once again re-build robust pre-Jurassic human immune strength in the modern age of digital data's where vast resources are accessible to achieve great results long term in human health.

# VK PLATINUM

## Features, Functions, and Purpose of the PLATINUM O2 Tokens:

### Stake for Value & earnings

Staking PlatinumO2 is the process of acquiring the tokens through purchasing the Token, which enables those who stake PlatinumO2 Tokens to both receive more tokens monthly while tokens increase in price. This process is a two-step method.

### Share Care

Sharecare considers that others will be more inclined to help those that they know or are associated with groups and organizations that have outreach programs to help others who, unfortunately, cannot afford high-level nutrition. Therefore, V K Platinum products are then made available to the less fortunate at a lower price to these efforts.

### Mobilize Masses

V K Platinum products will attract influencers from both social media and traditional media. The key is to utilize these influencers to promote and market V K Platinum products to a larger audience across all sectors and industries. This is what is meant by mobilizing the masses, which is a very specific position for influencers.

### Build P2Pi3

Building a phone app that allows person to person sales as an affiliate will greatly increase other's ability. Also, earning income through their mobile phone app created by platinum VK LLC utilizing techniques, methods, and strategies presented in the app's video marketing section.

### Affiliate Prime

Prime Affiliates is a network structure which enable affiliates to build quadrant teams vs, binary complexes, an affiliate will only participate in two teams of four members each for a total of eight persons, or four persons per team. This method maintains continuity and cohesion of the teams while increasing profit margins collectively.

### Autoship Stakers

Auto stakers are participants who purchase VK Platinum products with an additional or bonus. These bonuses earn platinum O2 tokens stakers new tokens each time purchase of a product or purchase of more tokens; this option includes A3 level networks

### B2B Partnership Options

Business to business relationships will revolve around partnerships and distribution of products through various networks and global partnerships that express interest and or a need for VK. platinum products.

# VK PLATINUM

## **Global Network Grid Token Pillar**

The first pillar of the global network will include using the Token as a payment system in local currencies for community groups that will be harvested. Clean botanical specimens identified as key ingredients for products in a sanitary environment to be collected and shipped to be processed at a central location will be processed and packaged for use or distribution. The Token will be convertible to local currency for immediate use by partners to identify and collect specific botanical species certified wildcrafted and organic by a reputable independent organization.

## **Digital Wallet Options**

Because there are so many wallets available for cryptocurrencies, platinum O2 has a digital wallet option to use as the primary wallet for Platinum O2 tokens, or one may use more traditional wallets such as Genesis meta mask. This option simply diversifies which wallets are more secure in is compatible with platinum O2 tokens.

## **VK Platinum App**

V K Platinum app will be available in Google Play Store, Apple Store, and other online stores. The app essentially gives users a great deal of flexibility as an affiliate or product purchasing to purchase tokens, including other options that offer many opportunities.

## **R&D Exploration Initiatives**

V K Platinum will hire a team of researchers and data analysts as the nutrition DNA project bills and defined its initiatives through well research data. This will build the strongest premise of natural nutrition. Villa wildcrafted botanical specimens are a source of primary nutrition, which contains nutrients, minerals, enzymes, and trace minerals unavailable and crops essential to optimum human health.

## **Planetary Botanicals DNA Nutrition Initiative**

The planetary botanical DNA nutrition initiative is a massive undertaking in identifying botanical species produced by nature's original plant life, traced back hundreds of thousands of years two animal and human health, which evolved both animals and humans over millions of years. These botanical species must be identified, analyzed, categorized, and included in the nutritional intake of humans on a global scale to reestablish ancient nutritional botanicals, which hold the key to reducing disease and nutrient deficiencies rather than supplement these trace minerals with supplements that often are not from a botanical source such as natural plants which contain the perfect balance of these trace minerals for human consumption.

Botanicals that are not heated or processed, including irradiation or other denaturing procedures, are never applied to any of VK Platinum ingredients or products; botanical integrity is essential to optimum health by preserving all constituents therein.

# VK PLATINUM

## Botanical Production-Processing-Value Staking

Platinum O2 tokens value range includes staking botanical production, and this option provides token holders with three bonuses:

- A specific percentage of tokens is earned each harvesting.
- A 25% discount on all products purchased by investor
- A package of profit-sharing benefits to stakes

## Bonus Offers on all Health and Nutritional Products

VK Platinum has expanded the holistic health and wellness horizon to the Blockchain through the ubiquitous functional token platinum O2, a token designed to achieve realistic results of both product availability quality and uniqueness in the health and wellness industries

The Dietary Supplements market in the U.S. is estimated at US\$46 Billion in the year 2020, projected to reach a value of US\$ 349 billion by 2026. Platinum VK projects a strong entrance into the supplement, wellness and nutrition industry in 2021, providing superior nutritional products from nature's original botanical DNA. VK Platinum initiatives include Partnering with a university specializing in agriculture and human health that wishes to convert agricultural lands to organic alternate cash crops. The initiative will provide great opportunities for the university and students who will learn the values of pre-agricultural plant breeding from natural plants. Nutrition and wellness would emphasize the pilot project, crops such as (Chenopodium album) or lambs' quarter. For instance, one cup of the chopped leaves gives you 464 mg of calcium (compared to 30 in spinach) and 66 mg of vitamin C (8.4 mg in spinach) as well as 76 mg of Magnesium. And best of all, these plants grow wild and are not currently cultivated yet is very much in demand.

VK Platinum has identified over forty-seven natural plant varieties in high demand throughout the health and wellness industries, which will only increase demand as a better option than growing crops at a fraction of the cost and three hundred percent more profitable. In conclusion, unlike commercial agriculture, which requires a great deal of chemical input for crop growth, plant selection of these types do not require such input but grows best in fertile soil unpolluted with chemical fertilizers, yet will thrive with soil amendments such as:

- Botanical Compost
- Earth Worm Castings
- Seaweed Meal
- Liquid Compost
- Humate Acid
- Fulvic Acid
- Molasses
- Food Grade Hydrogen peroxide
- Clean Filtered rainwater

# VK PLATINUM

Natural plants derive their primary nutrition from common soil types. They will thrive by adding non-toxic growth enhancers, which do not harm the micro-organisms in the soil but rather increase their populations. The partnering university will also greatly contribute to the DNA nutrition-specific research project. VK Platinum has initiated a uniquely specific nutritional approach to various racial and ethnic groups. Mostly, to increase the life span and health of the broad spectrum of peoples around the Globe. This approach is backed by centuries of dietary preferences precolonial era, or more specifically, ancient people eating before industrial agriculture when nature was the primary garden. Therefore, it is reasonable to conclude that cultivating and consuming natural plants reintroduced to the world can reduce:

- Our carbon footprint
- Reduce water table pollution and runoff
- Reduce farming cost
- Earn higher income per pound vs. common food crops
- The high demand for such crops enables pre-sold crops
- Supply industry wholesalers of organic botanicals
- Build added Value of chosen crops such as evening primrose flower essential oil
- Supply V.K. Platinum with needed supplies for its products
- Harvest seed and sell seeds
- Build a large collection of edible plants from the wild and teach others how to harvest and prepare

To properly process some crops will require specialized equipment such as:

- Dehydrators
- Milling machines
- Washing facilities
- Desiccants
- Chopping machine
- Separator machine

However, only smaller size machines will be used as crops are grown during the pilot program will be used by V.K. Platinum's broad range of natural health-related products entering the global market throughout 2022. The partnership with the agricultural university will also include contributions from its health and nutrition departments partnering with VK Platinum DNA Specific Nutrition projects.

# VK PLATINUM

## Platinum02 Economic Outlook

Platinum VK economic-financial objectives to establish a large network of partnerships forging a global distribution network begin by

- Building our affiliate network of 700 national distributors and sellers of platinum VK superior botanical products to increase sales by 600%
- Establish platinum VK unique product line (flush me out), an all-natural product that removes THC, aluminum, heavy metals, nicotine, and alcohol from the body in vape stores change nationwide
- Establish distribution relationships with marijuana dispensary chains nationwide
- Integrate all of these actions and more into the platinum O2 token, which will allow fast access to all of VK Platinum #27 products on and off of the Blockchain

## PLATINUM<sup>02</sup> TOKENS

# VK PLATINUM

## Affiliates a Closure Look

PlatinumO2 Tokens are awarded to affiliates every week when sales of six hundred dollars per day are achieved, token rewarding increases based upon the amount sales daily example:

- Sales of 600 dollars a day earned would generate twenty-five PlatinumO2 Tokens.
- Sales of 1200 dollars a day earned would generate sixty PlatinumO2 Tokens
- Sales that exceed 1200 dollars daily are rewarded one hundred PlatinumO2 Tokens per day

The additional bonus includes complementary products available to affiliates monthly from the Platinum VK product line for all productive affiliates.

PlatinumO2 Tokens initial value during the launch will be 0.58 cents per the Token USA, pricing is set at a lower price to encourage investors, affiliates, and others to acquire PlatinumO2 Tokens as units of value, which increase through the commerce of VK Platinum broad range of initiatives involving key niche sectors in both western and global markets emphasizing health, wellness, fitness, nutrition, and longevity.

PlatinumO2 Tokens gain traction due to major exchange listings, market share, blockchain integration, including our expanding Affiliate Network of high-performance Influencers take off, the price point of PlatinumO2 Tokens will begin to skyrocket organically throughout global markets.

Men prostate health has become a major health concern worldwide, Bull Gorge provide re-mineralization through deep nutrition through an all plant-based formula. Bull Gorge formulas combine the most potent botanical remineralization plants from across the entire globe to form the deep nutritional base to which prostate health depends. with over 137 botanical plant species, this formula optimizes nutritional mineralization topically and internally.

# VK PLATINUM

**VK 10X BOOST**  
Containing over 150 botanical plant compounds

- Bryophytes 12
- Angiosperm 107
- Gymnosperm 10
- Pteridophytes 21

**Flush Me Out**  
A Concentrated Formula That Purge Internal  
Toxins

- Shiljat
- Goji Berries
- Activated Charcoal
- Sea Plant Species

**Lean and clean intestinal cleanser and rebalancer**  
Made of all-natural ingredients to include:

- Cascara Sagrada
- Psyllium Husk
- Aloe Ferox
- Lemongrass Powder Plus

**SILENT FLOWERS**  
Botanical Balance For Women

- Wild Wisteria
- Mimosa Flowers
- Evening Primrose
- Watercress Plus

# VK PLATINUM

## VK BOOST

- Dense high impact nutrients
- Energy throughout the day
- Thousands of plant compounds
- High in essential Minerals

## VK BOOST FORMULA

- Dense high impact nutrients
- Energy throughout the day
- Thousands of plant compounds
- High in essential Minerals

## VK PLATINUM PRODUCT LINE

- Women #3 Products
- Men #4 Products
- Children #4 Products
- Everyone #21 Products

## PlatinumO2 Token

- The Crypto Token For Natural Health on the Blockchain
- The Token that increases in value through natural health

# VK PLATINUM

## PlatinumO2 Token

- The Crypto Token For Natural Health on the Blockchain accessible around the Globe
- The Token that increases in value through natural health and every purchase

Dembe 10 X Capsules contains Pine needle, Graviola, Watercress, Elderberry, and Sea Buckthorn including #45 additional botanicals, for revitalized energy and rejuvenation when you need that extra boost throughout your day. Used throughout the day supports lasting focus and needed pep.

## Sex Mate

**Sex Mate is an All-Natural Male Potency Formula**

- Men Sexual Health
- Men Prostate Health
- Male Energy Enhancement

# VK PLATINUM

## Platinum VK road map

There are essential industries in which VK Platinum can make the greatest impact in terms of product awareness, market share, and unique positioning; these markets are also growth markets worldwide on an upward trend

### Health and Wellness

V.K. platinum concentrates its efforts on both product awareness and market penetration; these efforts include:

- Product marketing directly to consumers
- B2B product placement agreements
- Advertising and promotion throughout dozens of social media platforms
- Increasing P.R. activities such as appearing on a wide variety of social media influencers platforms as a guest
- Submission of three press releases issues per year emphasizing new products, growth objectives, and value-added enhancements

### Fitness industry

Platinum V.K. has extended its reach of product awareness into the fitness/lifestyle industries. Platinum V.K. nutrient-rich products are all complementary to the fitness lifestyle industries.

### Vitality industry

Male and female vitality is an industry that is growing rapidly in search of healthy options which support revitalization. Platinum V.K. approaches to vitality is purely a safe botanically derived emphasis.

All four industries comprise the markets in which platinum V.K. focus is a primary target for Platinum V.K. products, services, and education.
